Obtaining a New Sign Permit

How to
Make the
Process Go
Smoothly.

1 Apply for a Permit:

- Provide the name, address and phone number of the property owner, the permit applicant and, if applicable, the contractor and/or plan preparer.
- Provide a project description including the size and location of signage.
- If the contractor is a homeowner or individual contractor without Workers' Compensation Insurance, a Workers' Compensation waiver must be submitted.
- If the contractor has employees, a Certificate of Workers' Compensation Insurance, naming the City of Rochester as the certificate holder, is required.

You can obtain these forms at the Permit Office.

2 Follow Through with Application Requirements:

- Ensure that all necessary inspections are performed. Inspection of footings and/or foundation depth before pouring concrete and setting posts for self supported signs and upon completion is required.
- Ensure that all work is performed as per the plans submitted with the permit application; and that no damage or encroachment occurs to adjacent property during construction.

3 Supply Additional Submissions:

- Photos of existing signs on the property and the proposed location of the sign on the building or site.
- You must also include two (2) copies each of:
- An Instrument Survey Map of the property.

- Construction details, drawn to scale, including dimensions, graphics, methods of attachment, and footings/foundation, if applicable. Freestanding signs higher than five (5) ft. require plans signed and sealed by a design professional licensed in the State of New York.
